

## Freedom of Information request & West Norfolk CCG response

### WN-2016-00180 – Mental Health Issues for each WNCCG Surgery

My aim is to be able to understand, using the current statistical knowledge, where various mental health issues may occur and potentially be able to offer help through Village Coaching Network.

For this to be a practical and as accurate information as possible it would be necessary to know the number of patients in each G.P. Practice under your guidance so that a mapping process can proceed.

Would it be possible to provide me with this information under the Freedom of Information Act 2000? Obviously the data would not include sensitive information, as I am merely interested in numbers.

*The information provided below is accurate as of October 2016:*

<b>Practice Name</b>	<b>Actual List Size</b>
