

Freedom of Information request & West Norfolk CCG response

WN-2017-0242 - Community Services

Are there pathways, like for example a DVT pathway, that allows patients to be looked after without needing A&E but having tests organised by general practice that traditionally were done in secondary care?

Yes.

-Is there new community services with support from secondary care (like hospital diabetes staff or mental health staff working within practices premises to allow more patients to be looked after in the primary care setting?

Yes.

Under section 16 duty to provide advice and assistance, I have included the website links for our various publications and operational plans. Please refer to them if you need further information.
